Explanations and Support of the Changes of the English Translation of the International Publication of PCT/CN02/00948

It has been found that there are some parts of the English translation of the internationally published specification and claims in Chinese, which may be not accurate. Now it is requested to allow the applicant make corrections to these inaccurate parts of the English translation of the internationally published specification and claims.

Following form shows clearly the locations of the changes of the English expressions with reference to the marked version of the corrected English translation of the international publication and the locations of the Chinese expressions for supporting this change with reference to the international publication in Chinese.

Most of the changes relate to the previous English expression “habitant(s)” which, as an English translation of the Chinese expression “□□” is not quite accurate. The more accurate one should be “human culture”. Many changes relate to the previous English expression “habitant(s)”, which as an English translation of the Chinese expression “□” is not accurate either. The accurate translation of the Chinese expression “□” should be “human(s)”. Therefore the following form does not unnecessarily list all the locations for the same changes. Moreover, many other changes also relate to the correction from “habitants” to “human culture” or the correction from “habitants” to “humans”.
